Mobile Phone App

Never miss an important call. Our mobile app puts the power of your hosted voice service into the palm of your hand. Make business calls on the go while taking advantage of the unique features of our hosted service.

Managed Hosted Voice (mHV)

As the urgency for businesses to migrate to Hosted Voice service increases, the industry continues to battle challenges with quality and reliability. nexVortex addresses these challenges with its patent-pending Managed Hosted Voice service. The service comes with the nexVortex Edge device (nVE) which can be added for as low as \$35 per month (per location). Managed Hosted Voice provides service benefits for customers with a single or a dual WAN internet access configuration.

cloudQ® (cQ) Contact Center

cloudQ® is a powerful inbound contact center solution that is highly affordable, easy to set up, and provides your business with the necessary features and reports to run your business more effectively. This affordable service is priced at \$19.99 per seat.

* See nexVortex for supported make and model phones. \$19.99 seat price is valid for orders of 10 or more seats on a 3-year term. See nexVortex for pricing on smaller applications. cloudQ® pricing includes up to 3 queues, more queues can be purchased.
