

# Managed SIP Plans

## Delivering Reliability, Quality, and Visibility

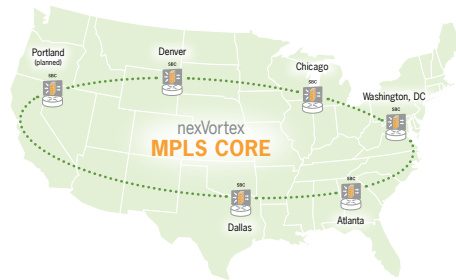

As the urgency to migrate from PRI services to SIP Trunking increases, the industry continues to battle challenges with QoS, interoperability, and finger pointing.

nexVortex's managed SIP (mSIP) allows business users to confidently migrate to SIP Trunking without sacrificing voice quality or performance while gaining visibility into how their voice services are performing. Our solution delivers:

### Quality

#### Multiple Connection Options

- › nexVortex peering relationships reduce latency, packet loss, and jitter by connecting directly to the nexVortex mSIP network
- › Edge router traffic prioritization
- › Optional nexVortex provided internet access with CoS

Redundancy through Multiple Data Centers

### Disaster Recovery

#### Monitoring + Disaster Recovery

- › Redundancy through multiple data centers
- › LAN level autodetecting disaster recovery
- › Optional dual WAN failover
- › Toll-Free RespOrg

### mSIP with Dual WAN Failover

### Peering Relationships

### Visibility

#### Eliminates Finger Pointing

- › Call quality analytics taken at multiple points in call path
- › Monitoring from customer premise outward
- › Alarming with proactive notification

mSIP pricing begins at \$329 per month which includes 23 channels, an edge router, and monitoring service. See your business partner or sales@nexVortex.com for pricing on additional channels or for circuit pricing.

## At a Glance:

- › Best-in-class solution
- › Voice quality metrics and measurement
- › High availability and redundancy
- › Monitoring tools provide visibility
- › Our world class network gives our customers confidence
